Job Description

About Antyxsoft

Since its establishment, Antyxsoft Cloud assists modern businesses to achieve the digital transformation required to survive in today's competitive business environment. By offering a large portfolio of cloud services and products, Antyxsoft Cloud helps you to move smoothly your working environment to the cloud, without worrying about infrastructure and software management. In this way, business customers and partners minimize their IT costs, increase their flexibility and work more productively. With strategic partnerships with leaders in the IT industry, Antyxsoft Cloud serves customers in the Greek and international markets, helping them to improve user experience and grow their business. Combining our high-performance cloud infrastructure with enterprise-grade cloud solutions, we enable our customers and partners to succeed. Our knowledge, skills and expertise allow us to change the reality of digital landscape. Join us.

DevOps Engineer

based in Thessaloniki or Athens

Responsibilities

- You will design and develop procedures and scripts in order to implement and maintain continuous delivery.

- You will run, build and deploy processes and monitor applications and systems.

- You will test systems for security, performance and reliability.

- You will write and maintain documentation regarding system design, processes and troubleshooting.

Requirements

To be a successful candidate, your profile should match the following criteria:

- You have at least one year experience with relevant technologies and duties.

- You have good knowledge of Linux operating system (and Windows)

- You have good knowledge of Bash shell scripting.

- You have good knowledge of Version Control software, such as Git.

- You have good knowledge of automation tools, such as terraform, ansible and Jenkins.

- Holding a university or College Degree in Computer Science, Engineering, or relevant technology-related field will be considered a great plus.

- You have an excellent command of the Greek & English language, both written and spoken

- Completed military obligations for male candidates

- … we work, above everything else, as a TEAM. So, you also have to be an excellent team player and you are able to orchestrate and influence cross- functional teams within our Company

At Antyxsoft, our employees are our most valuable assets. And they deserve to work in an environment, where everyone is treated with dignity and respect. Antyxsoft is committed to creating such an environment because it brings out the full potential in each of us, which, in turn, contributes directly to our business success. We cannot afford to let anyone's talents go to waste.

Thus, we provide:

- A competitive compensation package according to professional experience, combined with additional benefits
- An extensive training program upon induction and throughout employment
- Exceptional opportunities to learn and develop in a multinational environment
- Prospects for professional growth both locally and globally

So, if you are eager to join a truly cutting-edge technology company, submit your resume!
